BLOCK BOTTOM BAGS

Block bottom bags are suitable for contact with food product such as pasta, biscuits, chocolates, candies and much more.

Block bottom in transparent polypropylene are available in coextruded and in dual-coated, are heat-sealable and they have a great barrier to the humidity.

Items made in NatureFlex™, compostable certified according to the european normative EN 13432, have a great resistance to fats and high barrier to aromas as well as oxygen.

HEAT-SEALED BAGS AND FLAT BAGS

The **heat-sealed bags** are ideal for packaging products such as flours, dried fruit, ice lollies, ice creams, cereals and bread sticks.

Each bag is equipped with an excellent **barrier to the external agents**, maintains the **quality** and fragrance and taste of the chosen food.

The heat-sealed bags with double-folded bottom in **NatureFlex™**, in addition to having the same properties of heat-sealed polypropylene bags, are **compostable certified product** according to the European normative EN 13432.

OUR STRONG POINTS

SUSTAINABILITY

The choice of environmentally friendly means of production, the careful use of natural resources and social responsibility towards all the people involved in the value chain have been the company's three guiding business pillars over the years, which have allowed Eurocell to implement the sustainability report.

CUSTOMER CARE AT 360°

Since 1988, Eurocell puts in the first place courtesy and attention to the customer. The firm has a large warehouse, a key element in order to guarantee rapid deliveries.

CUSTOMISED PACKAGING

Up to eight-colour flexo printing. Eurocell grants packaging customisation, offers the possibility to create your own product by color and sizes. The purpose is to give to customer the opportunity to personalize its own product and make it unique.

OUR CERTIFICATIONS

BUSINESS

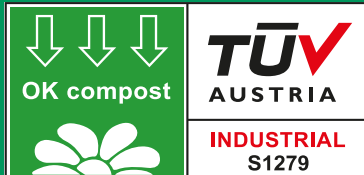

BRGS Packaging Materials: Standard sets a benchmark for all packaging manufacturers by offering guidance in the production of safe packaging and product quality management.
